# TEACHER TRAINING

## Students at the Centre of Lessons

“In this training, I learned new and modern ways of teaching which make it easier for the students to learn. This included the organisation of lessons, student-centred learning methods and blackboard management.”

*Moroch - Female maths teacher at the Lycée Jamhuriat in Kabul*

“Since I attended the training course, I know how important it is to use the right tools during my maths lessons. The ruler helps my students a lot to understand metrics – their learning curve is much steeper now.”

“During the training, we learned a new method for additions. My colleagues in the lower classes told me that the children grasp the concept of additions more easily now.”

*Moroch - Female maths teacher at the Lycée Jamhuriat in Kabul*

### FACTS & FIGURES

- Maths teachers have received two trainings already, which lasted for more than three weeks. A third and final training course will be held later this year.
- The 20 participants are teachers at three schools in Kabul: Jamhuriat, Amani and Aisha-e-Durani.
- Other trainings are currently being held or planned for chemistry, biology, physics, IT as well as German and English teachers.
- The training courses are funded by the Afghan-German Cooperation via the programme to Strengthen German-supported Schools in Kabul (SGS).
- SGS has been active in Afghanistan since November 2014.
